SUMMER 2019

## Federal Credit Union

### Summer Skip-a-Pay

Just when you need it most, our Skip-A-Pay program can give you extra cash for your summer. Use the money to head out for a long vacation weekend, or pay off some bills. For just \$35\* per eligible loan, you can choose to skip your qualifying Visionary FCU Loan payment in August. To make your request, stop by the Credit Union, or complete the form below and mail it or fax it to us by July 31, 2019. Please note that ALL BORROWERS on the loan(s) must sign the form.

The \$35 processing fee is a NON-REFUNDABLE FEE and will automatically be withdrawn from your Share Savings or Share Draft (Checking) Account at the time you sign up for the skip-a-payment program. If you make your loan payments with Payroll Deduction or Direct Deposit, your payment will be deposited into your Share Savings Account. Reminder: Throughout the month of the skipped payment in August 2019, interest will continue to accrue on your loan.

\*You may choose to skip August 2019 payments only. No skip-a-payment request will be processed without payment of the fee. Home equity loans and VISA® credit card loans are not eligible. Must be a member in good standing. All loans must be current as of July 31st to be eligible to skip payments. Qualification for this special promotion is subject to approval. Processing fee is per qualifying loan.

## Your CU Is As Close As Your Phone With Our Mobile App

If taking care of your financial business is not on your Summer Fun Checklist, you'll want to download the credit union's Mobile App Touchbanking. It will put the credit union as close as your mobile device - whether you're at the beach or a baseball game. Need to deposit a check? Use the remote deposit capture feature. Want to transfer money between your accounts? Done with a few swipes. Need to view account balances and details for your savings, checking, certificates, loans or credit cards? It's all there 24/7. Just make sure your mobile device is up-to-date and you're using the latest version of the operating system. This not only helps improve functionality, but also helps ensure safety, as security fixes are usually addressed in updated versions of software.
